

## RFS to showcase its industry leading secure communication equipment in-person at PMRExpo

Hannover, 23rd November 2021, Radio Frequency Systems (RFS), a global designer and manufacturer of cable, antennas and indoor coverage systems, announces it will exhibit its full portfolio of CPR certified RADIAFLEX® radiating cables and CELLFLEX® cable for indoor applications, alongside its new smart fixing solutions at PMR Expo from the 23rd to 25th November 2021, [Hall 10.2/C38](#).

PMR Expo, Europe's leading trade fair for secure communications will host its first in-person event since November 2019. The event which showcases the best in mission-critical communication solutions is being held at Koelnmesse with 230 exhibitors expected.

RFS will demonstrate solutions that put it at the forefront of fire safe communications equipment worldwide. Amongst the solutions at the show will be RFS's flagship RADIAFLEX radiating cable that enables contoured RF coverage, offering consistent, reliable coverage in even the toughest environments without compromising on safety. It meets the highest European safety standards with all radiating cables rated CPR class B2ca s1a d0 a1 - the highest possible certification. Not only does this demonstrate the ability to maintain performance in extreme heat, the d0 subclass shows that RFS's cable does not drip in the event of a fire.

RFS will also exhibit for the first time its Smart Fixing Solution (SFS) Clamp Series. This solution ensures a safe and reliable RADIAFLEX cable installation in harsh environmental tunnel conditions, where security-critical communication is essential. The SFS clamps are based on a one-piece, self-closing plastic pipe clamp which fixes radiating cables on roads and in railway and metro tunnels allowing RFS cables to be installed virtually anywhere. The clamps also feature a fire secured mounting functionality by allowing additional metal cable ties to be installed together with the SFS clamps.

Jörg Kretschmar, Technical Sales Manager Indoor Solutions at RFS commented "It is great to be heading back to PMRExpo after two years of virtual events. The show has always demonstrated the best of the best when it comes to secure communications and we're thrilled to be able to show our latest and flagship solutions to the industry in-person."

### About RFS

Radio Frequency Systems (RFS) is a global designer and manufacturer of cable, antenna and tower systems, plus active and passive RF conditioning modules, providing total-package solutions for wireless infrastructure.

RFS serves OEMs, distributors, system integrators, operators and installers in the broadcast, wireless communications, land-mobile and microwave market sectors. As an ISO compliant organization with manufacturing and customer service facilities that span the globe, RFS offers cutting-edge engineering capabilities, superior field support and innovative product design. RFS is a leader in wireless infrastructure.
